

VISION

"You have never seen wine like this!"

Silvio Nitzsche, WEIN | KULTUR | BAR Dresden

INTENSE

For opulent, great growth, powerful white and red wines, rustic, acidic white and red wines, young and middle aged Bordeaux wines

BALANCED

For white and red Burgundy, great Piedmontese wines, highly complex but sensitive white and red wines, extremely opulent rosé wines and old vintage champagne

FRESH

For extremely fresh white wines, Prosecco or any variety of sparkling wine and light rosé wines

STRAIGHT

For pure grape varieties and fruity / aromatic red and white wines

RICH

For fortified, sweet and dessert wines and any type of distilled beverages

NOSTALGIC

For cocktails, or as a food glass

SIDE

For mineral water and soft drinks

FOR
WINE
LOVERS

The vision of simplicity

No distinction is made between red wine or white wine glasses in this collection, the glasses are simply theme- or character-based. The names of the glasses FRESH, STRAIGHT, INTENSE, BALANCED, RICH, NOSTALGIC and SIDE clearly explain what they are used for. You intuitively reach for the glass which in the best way presents the flavours of the wine that you particularly wish to emphasize. If you want a powerful wine to be more harmonious or a touch more lively and fresh, you pick the glass with the designation that mirrors your requirement best.

The VISION series provides perfect wine enjoyment: intuitive, uncomplicated and always in accordance with your own desires. However, it is particularly the fascination of the light, the colours, the refraction and the visual depth that make it impossible to tear your eyes away from the glass, because: **You have never seen wine like this!**

Filigree craftsmanship

Zieher glasses are all about top quality craftsmanship, which is created in one of the most innovative and best glass blowing workshops in the world. The glasses are manufactured of lead-free crystalline glass, using a traditional, hand-blown method. Each glass is unique and has been created by a glass blower with artistry and dedication.

Innovative design

The VISION range is guaranteed to provide a highly sophisticated and fascinating design, accompanied by a unique aesthetic perception.

Maximum presence of aroma

The shape of the chalices and waveform of the bottom enable a maximum presence of the aroma and optimum development of the wine.

WINE DEVELOPMENT AID WORKERS!

"STAR" THE GENTLE!

The individual star in the Center of the "Star" decanter integrates the oxygen in the interior of the wine by gentle swings. The wine develops the aroma very softly and balanced from it's inside and not, as with other decanters, at the surface only.

"STAR" – mini THE ALLROUNDER!

The reduced size is perfectly suitable for the decanting of open wines and small bottles. Additionally it offers the possibility to decant white wines and to temper them in a cooler. Also suitable for desert wines, the staging of high-end cocktails, flavoured spirits, exotic juices and other delights to the palate.

"EDDY" THE RAPID!

Inside the "Eddy" decanter the wines pass circulating and with manifold swirls through a development in taste and structure in a time-lapse. Within seconds the wine experiences a respiration which normally can only be reached in a decanting process of several hours.

"EDDY" - mini THE COMPACT ONE!

The small "Eddy" is perfectly suitable for the decanting of wines by the glass or small bottles. Thereby the ideal charge to maximise the content of oxygen is 0.375 ltr. The compact design is perfectly suited to decant white wines first and then to temper in a wine cooler.

"DOPPIO" THE DOUBLE STACK!

When pouring into the "Doppio" decanter, the wine is distributed over two levels, creating appealing visual effects and maximizing the oxygen contact of the wine through the significantly enlarged surface. The division into two is retained even when pouring out and intensifies the aeration through additional swirling.

"PEBBLE" THE CLASSIC!

The handblown decanter in classical shape results from the high craftsmanship of experienced glassblowers. The shaping of the neck, the bell-bottomed body and the three dents, integrated in the bottom, provide already during the pouring a maximisation of the contact with oxygen.
