"Carbon 4.0"

"Carbon 4.0" upgrades this innovative material made of carbon fibre to a new level!

Contrary to "V12", which contains a woven carbon fabric, these displays consist of fibre chips which are pressure-grouted and embedded in synthetic resin. The result is a completely new look of the classic carbon material.

Depending on the incidence of light, the displays sparkle in dark and light shades, the depth effect and brilliance of the high gloss surface intensifies this effect enormously.

buffet display "Carbon 4.0"

carbon fibre (chips), black, high-gloss, bottom side closed, splashproof, not dishwasher-safe

"Bloxx" - flawless like diamonds!

Black blocks, inconspicuously linked by connecting pieces made of crystal clear glass, are towering like supporting pillars of modern architecture. The clear spaces are open to the light and show interesting reflections and effects. The series stands out due to high-quality optical glass. To name just a few features of this material, it is absolutely bubble-free, crystal clear and homogeneously black coloured. The clear glass is of lens quality and resistant against any discoloration by UV light.

buffet stand "Bloxx"

optical glass, black and transparent, delivery in black gift box

"Curve" – flexibility with a concept

"Curve" is made of 3 mm strong galvanised steel with a high grade powder coating. This guarantees great stability and corrosion-resistance. The gaps between the bars were expressly chosen by the Milanese designer Itamar Harari in order to make the raisers completely compatible with the systems "Skyline" (main catalogue, pages 16 to 21) and "Squareline" (main catalogue, pages 22 to 24). The attractively priced "Curve" system is therefore not only suitable as a starter version but also as an optimal extension of existing systems.

During the development of "Curve", special attention was given to the mobile usage. Thus all components can be stored in an extremely space-saving way. Simple and swift to install, "Curve" is the perfect equipment for outdoor areas, events and catering.

buffet stand "Curve"

galvanised steel, 3 mm thick, white (powder-coated), not dishwasher-safe

"Pearl"

The unique look of the "Pearl" buffet displays is achieved by the processing of high-grade shell imitations molded into polyresin. This is why each cube is an individual item and might vary in its form and structure. The displays are the outcome of highly sophisticated handicraft. Each piece is sanded until it becomes extremely thin and then customized to the desired shape. Thereafter, the single pieces are arranged into an elaborate herringbone pattern. In order to guarantee the necessary stability of the displays, the inside is made of fibreglass and the outside of high-gloss artificial resin. Whether with or without illumination, the pearly coloured displays are outstanding in every light!

buffet display "Pearl"

high-quality shell imitation, mother-of-pearl effect, washable, bot tom side open, hollow inside, with 4 resin feet for easy placing of cables for LED-light item 8104 (available in the main catalogue on page 44; please order separately)

For an intense and all over illumination, we recommend the usage of 3 LED-lights per display. The lights are available in the main catalogue on pages 44 and 45.
